

AMENDMENT UNDER 37 C.F.R. § 1.111  
U.S. APPLICATION NO. 09/751,391  
ATTORNEY DOCKET NO. Q62029

**AMENDMENTS TO THE CLAIMS**

**This listing of claims will replace all prior versions and listings of claims in the application:**

**LISTING OF CLAIMS:**

1. (*Currently Amended*) A method for exchanging trading points through a transaction processor connected to a telecommunications network, wherein the method comprises:
  - receiving a request at the transaction processor to exchange ~~trade~~ trading points awarded to a first customer from a member shop,
  - carrying out a transaction at the transaction processor corresponding to the request to exchange ~~trade~~ trading points with at least one other customer, wherein the transaction processor purchases trading points for a first type of goods or services from the first customer at a first exchange rate and sells the purchased trading points to the at least one other customer at a second exchange rate, and
  - calculating the difference between the first and second exchange rates used by the transaction processor as a transaction commission, wherein, in exchange for the trading points for a first type of goods or services, the first customer receives either a monetary equivalent or trading points for a second type of goods or services from the at least one other customer.
2. (*Original*) The method of claim 1, wherein the trading points are selected from the group consisting of: cyber money, product purchasing points, advertisement clicking points, thank-you coupon, and mileage points.

AMENDMENT UNDER 37 C.F.R. § 1.111  
U.S. APPLICATION NO. 09/751,391  
ATTORNEY DOCKET NO. Q62029

3. (*Currently Amended*) The method of claim 1, wherein the transaction processor calculates a balance of the first customer's remaining trading points after the first customer uses the trading points to purchase a good or a service.

4. (*Currently Amended*) A method for exchanging trading points through a transaction processor connected to a telecommunications network, wherein the method comprises:

collecting information regarding a first customer's trading points portfolio from member shops through the network and storing the information in a customer database connected to the network;

receiving information at the transaction processor on a trading points exchange trade request from the first a-customer;

initiating a transaction at the transaction processor with at least one other customer according to the received trading points exchange trade request, wherein the transaction processor purchases trading points for a first type of goods or services from the first customer at a first exchange rate and sells the purchased trading points to the at least one other customer at a second exchange rate; and

calculating the difference between the first and second exchange rates used by the transaction processor as a transaction commission, wherein, in exchange for the trading points for a first type of goods or services, the first customer receives either a monetary equivalent or trading points for a second type of goods or services from the at least one other customer.

AMENDMENT UNDER 37 C.F.R. § 1.111  
U.S. APPLICATION NO. 09/751,391  
ATTORNEY DOCKET NO. Q62029

5. (*Original*) The method of claim 4, wherein the trading points are selected from the group consisting of: cyber money, product purchasing points, advertisement clicking points, thank-you coupon, and mileage points.

6. (*Previously Presented*) The method of claim 4, wherein the transaction processor updates the customer database and a transaction database according to a result from the trading points transaction.

7. (*Previously Presented*) The method of claim 5, wherein the transaction processor updates the customer database and a transaction database according to a result from the trading points transaction.

8. (*Currently Amended*) The method of claim 4, wherein the transaction processor calculates a balance of the first customer's remaining trading points after the first customer uses the trading points to purchase a good or a service.

9. (*Currently Amended*) The method of claim 5, wherein the transaction processor calculates a balance of the first customer's remaining trading points after the first customer uses the trading points to purchase a good or a service.

AMENDMENT UNDER 37 C.F.R. § 1.111  
U.S. APPLICATION NO. 09/751,391  
ATTORNEY DOCKET NO. Q62029

10. (*Currently Amended*) A method for exchanging trading points through a transaction processor connected to a telecommunications network, wherein the method comprises:

collecting information regarding a first customer's trading points portfolio from member shops through the network and storing the information in a customer database connected to the network;

sending information regarding the first customer's trading points and exchange rates stored in the customer database to the transaction processor;

receiving a trading points exchange trade-request at the transaction processor from the first customer to exchange trading points with at least one other customer; and

transacting the first customer's points at the transaction processor according to the received trading points exchange trade-request, wherein the transaction processor purchases trading points for a first type of goods or services from the first customer at a first exchange rate and sells the purchased trading points to the at least one other customer at a second exchange rate; and

calculating the difference between the first and second exchange rates used by the transaction processor as a transaction commission, wherein, in exchange for the trading points for a first type of goods or services, the first customer receives either a monetary equivalent or trading points for a second type of goods or services from the at least one other customer.

AMENDMENT UNDER 37 C.F.R. § 1.111  
U.S. APPLICATION NO. 09/751,391  
ATTORNEY DOCKET NO. Q62029

11. (*Original*) The method of claim 10, wherein the trading points are selected from the group consisting of: cyber money, product purchasing points, advertisement clicking points, thank-you coupon, and mileage points.

12. (*Currently Amended*) The method of claim 10, wherein the first customer's exchange ~~trade~~-request further comprises changing the first customer's trading points into a cash equivalent and processing the first customer's trading points according to the resulting cash equivalent.

13. (*Currently Amended*) The method of claim 11, wherein the first customer's exchange ~~trade~~-request further comprises changing the first customer's trading points into a cash equivalent and processing the first customer's trading points according to the resulting cash equivalent.

14. (*Currently Amended*) The method of claim 10, wherein the transaction processor updates the customer database and a transaction database according to the result of the first customer's exchange ~~trade~~-request, and sends the result to the corresponding member shop.

15. (*Currently Amended*) The method of claim 11, wherein the transaction processor updates the customer database and a transaction database according to the result of the first customer's exchange ~~trade~~-request, and sends the result to the corresponding member shop.

AMENDMENT UNDER 37 C.F.R. § 1.111  
U.S. APPLICATION NO. 09/751,391  
ATTORNEY DOCKET NO. Q62029

16. (*Currently Amended*) The method of claim 10, wherein the transaction processor calculates a balance of the first customer's remaining trading points after the first customer uses the trading points to purchase a good or a service.

17. (*Currently Amended*) The method of claim 11, wherein the transaction processor calculates a balance of the first customer's remaining trading points after the first customer uses the trading points to purchase a good or a service.

18. (*Currently Amended*) A method for exchanging trading points through a transaction processor connected to a telecommunications network, wherein the method comprises:

receiving a request at the transaction processor from a first customer to buy trading points from at least one other customer;

buying trading points corresponding to the request, wherein the transaction processor purchases trading points for a first type of goods or services from the at least one other customer at a first exchange rate, sells the purchased trading points to the first at least one other customer at a second exchange rate and calculates a transaction commission based on the difference between the first and second exchange rates; and

updating a customer database according to a result from the buying of trading points, and sending the result to a member shop that corresponds to the trading points, wherein, in exchange for the trading points for a first type of goods or services, the at least one other customer receives either a monetary equivalent or trading points for a second type of goods or services from the first customer.

AMENDMENT UNDER 37 C.F.R. § 1.111  
U.S. APPLICATION NO. 09/751,391  
ATTORNEY DOCKET NO. Q62029

19. (*Currently Amended*) The method of claim 18, wherein the transaction processor sends information concerning the first customer's trading points and transaction exchange rates stored in the customer database to the first customer.

20. (*Original*) The method claim 18, wherein the trading points are selected from the group consisting of: cyber money, product purchasing points, advertisement clicking points, thank-you coupon, and mileage points.

21. (*Cancelled*).

22. (*Previously Presented*) The method of claim 18, wherein the transaction processor updates a customer database according to a result from the buying process, and sends the result to the member shop corresponding to the trading points.

23. (*Previously Presented*) The method of claim 19, wherein the transaction processor updates updating a customer database according to a result from the buying process, and sends the result to the member shop corresponding to the trading points.

24. (*Currently Amended*) The method of claim 18, wherein the transaction processor calculates a balance of the first customer's remaining trading points after the first customer uses the trading points to purchase a good or a service.

AMENDMENT UNDER 37 C.F.R. § 1.111  
U.S. APPLICATION NO. 09/751,391  
ATTORNEY DOCKET NO. Q62029

25. (*Currently Amended*) The method of claim 19, wherein the transaction processor calculates a balance of the first customer's remaining trading points after the first customer uses the trading points to purchase a good or a service.

26. (*Currently Amended*) The method of claim 22, wherein the transaction processor calculates a balance of the first customer's remaining trading points after the first customer uses the trading points to purchase a good or a service.

27. (*Currently Amended*) The method of claim 23, wherein the transaction processor calculates a balance of the first customer's remaining trading points after the first customer uses the trading points to purchase a good or a service.

28. (*Currently Amended*) An apparatus for providing a points trading service through a telecommunications network, the apparatus comprising:

an information collecting unit connected to the network for collecting information on a first customer's trading points from a plurality of member shops;

a customer database connected to the network for storing the information on the first customer's trading points received from the member shops;

a transaction processing unit connected to the network that receives a trading points exchange trade-request from the first a-customer, and processes a transaction with at least one other customer according to the trading points exchange trade-request, wherein the transaction

AMENDMENT UNDER 37 C.F.R. § 1.111  
U.S. APPLICATION NO. 09/751,391  
ATTORNEY DOCKET NO. Q62029

processing unit purchases trading points for a first type of goods or services from the first customer at a first exchange rate, sells the purchased trading points to the at least one other customer at a second exchange rate and calculates a transaction commission based on the difference between the first and second exchange rates; and

a transaction database for storing information on the trading points exchange trade request sent from the first customer and a result of the transaction, wherein, in exchange for the trading points for a first type of goods or services, the first customer receives either a monetary equivalent or trading points for a second type of goods or services from the at least one other customer.

29. (*Currently Amended*) The apparatus of claim 28, further comprising an information providing unit for sending the first customer's trading point information and transaction exchange information stored in the customer database to the first customer.

30. (*Original*) The apparatus of claim 29, wherein the trading points are selected from the group consisting of: cyber money, product purchasing points, advertisement clicking points, thank-you coupon, and mileage points.

AMENDMENT UNDER 37 C.F.R. § 1.111  
U.S. APPLICATION NO. 09/751,391  
ATTORNEY DOCKET NO. Q62029

31. (*Original*) The apparatus of claim 29, wherein the exchange rate information indicates a cash value or an absolute value corresponding to the trading points and is provided by a separate system installed outside of the service providing server.

32. (*Previously Presented*) The apparatus of claim 28, further comprising a shopping mall management unit for processing cyber shopping, and providing trading points in proportion to a good purchased and a service for buying goods with the trading points.

33. (*Previously Presented*) The apparatus of claim 29, further comprising a shopping mall management unit for processing cyber shopping, and providing trading points in proportion to a good purchased and a service for buying goods with the trading points.

34. (*Previously Presented*) The apparatus of claim 30, further comprising a shopping mall management unit for processing cyber shopping, and providing trading points in proportion to a good purchased and a service for buying goods with the trading points.

35. (*Previously Presented*) The apparatus of claim 31, further comprising a shopping mall management unit for processing cyber shopping, and providing trading points in proportion to a good purchased and a service for buying goods with the trading points.

AMENDMENT UNDER 37 C.F.R. § 1.111  
U.S. APPLICATION NO. 09/751,391  
ATTORNEY DOCKET NO. Q62029

36. (*Previously Presented*) The apparatus of claim 28, further comprising:

a network interface for linking a service provider server to a member shop server; and  
a web server for linking a customer computer server to the service provider server via an  
internet.

37. (*Original*) The apparatus of claim 30, further comprising:

a network interface for linking a service provider server to a member shop server; and  
a web server for linking a customer computer server to the service provider server via an  
internet.

38. (*Original*) The apparatus of claim 31, further comprising:

a network interface for linking a service provider server to a member shop server; and  
a web server for linking a customer computer server to the service provider server via an  
internet.

AMENDMENT UNDER 37 C.F.R. § 1.111  
U.S. APPLICATION NO. 09/751,391  
ATTORNEY DOCKET NO. Q62029

39. (*Currently Amended*) A system providing a points trading service through a telecommunications network coupled to a customer computer and a member shop computer, the system comprising:

a customer computer for sending a trading points exchange trade-request;

a member shop computer for providing a first customer's points; and

a service providing server that stores the first customer's points received from the member shop computer, receives the trading points exchange trade-request from the first customer to exchange trading points with at least one other customer and processes a transaction with the at least one other customer ~~other customers~~-according to the trading points exchange trade-request, wherein the service providing server purchases trading points for a first type of goods or services from the first customer at a first exchange rate, sells the purchased trading points to the at least one other customer at a second exchange rate and calculates a transaction commission based on the difference between the first and second exchange rates, wherein, in exchange for the trading points for a first type of goods or services, the first customer receives either a monetary equivalent or trading points for a second type of goods or services from the at least one other customer.

AMENDMENT UNDER 37 C.F.R. § 1.111  
U.S. APPLICATION NO. 09/751,391  
ATTORNEY DOCKET NO. Q62029

40. (*Currently Amended*) A computer program product for enabling a computer to execute a points trading transaction, comprising:

software instructions for enabling the computer to perform predetermined operations, and a computer readable medium bearing the software instructions; said predetermined operations comprising:

collecting information on a first customer's trading points from a member shop; receiving a trading points exchange trade-request from a first customer's computer;

executing a trading transaction upon receiving the first customer's trading points exchange trade-request by trading points with at least one other customer, wherein the computer purchases trading points for a first type of goods or services from the first customer at a first exchange rate, sells the purchased trading points to the at least one other customer at a second exchange rate and calculates a transaction commission based on the difference between the first and second exchange rates, wherein, in exchange for the trading points for a first type of goods or services, the first customer receives either a monetary equivalent or trading points for a second type of goods or services from the at least one other customer;

calculating the first customer's trading point balance once the transaction has been processed; and

sending the first customer's final trading point balance to a customer database.

AMENDMENT UNDER 37 C.F.R. § 1.111  
U.S. APPLICATION NO. 09/751,391  
ATTORNEY DOCKET NO. Q62029

41. (*Original*) The computer program product for enabling a computer to execute a points trading transaction according to claim 40, wherein the trading points are selected from the group consisting of: cyber money, product purchasing points, advertisement clicking points, thank-you coupon, and mileage points.

42. (*Currently Amended*) The computer program product for enabling a computer to execute a points trading transaction according to claim 40, wherein the first customer's exchange ~~customer trade~~ request is for changing the first customer's trading points into a cash equivalent and processing the first customer's trading points according to the resulting cash equivalent.
